

Nuraia Nahrin Fahmida

Software Engineer

nuraianahrinfh@email.com | +880-1805509834 | LinkedIn: NuraiaNahrinFahmida | GitHub: NuraiaNahrinFahmida

Professional Summary

Software Engineer with experience in mobile application development, game development, and AI-driven solutions. Skilled in C#, Swift, Python, and Unity, with hands-on experience building production applications, interactive systems, and proof-of-concept innovations. Passionate about designing scalable software, solving complex technical problems, and delivering user-focused solutions through clean, maintainable code.

Experience

Samsung R&D; Institute Bangladesh | Aug 2025 - Present

Software Engineer - Samsung SmartThings (Windows) | C#, XAML

- Developed the Sleep Environment feature for the SmartThings Windows Client application using the MVVM architecture.
- Improved application accessibility by implementing Windows Narrator support across multiple screens and user workflows.
- Resolved High Contrast compatibility issues and fixed UI defects to improve accessibility and user experience.
- Collaborated with cross-functional teams to deliver production-ready features and bug fixes.

Samsung SmartThings (iOS) | Swift

- Developed and maintained the Settings module of the SmartThings iOS Client.
- Implemented notification management, deep linking, and re-inquiry feedback features using MVVM-C architecture and the application's data layer.
- Built reusable UI components using SwiftUI and reactive programming principles.
- Performed device compatibility testing across multiple iOS devices, identified defects, and delivered timely bug fixes.
- Collaborated using Git-based version control and Agile software development practices.

Technonext Ltd. (A US-Bangla Concern Company) | May 2025 - Jul 2025

Junior Software Engineer | HTML, CSS, React.js, Next.js, JavaScript

- Developed a responsive Swiggy-inspired food delivery web application and deployed it on Vercel.
- Built a Phonebook application implementing CRUD operations and reusable React components.

Brain Station 23 | Aug 2024 - Mar 2025

Unity Developer Trainee | Unity, C#

- Independently developed Sky Team, a digital cooperative board game in Unity and C#, implementing gameplay systems, UI, animations, and game state management for Google Play Store release and web deployment on itch.io.
- Contributed to The Square Meme Game for the Game Developer Community Bangladesh, developing gameplay features and core game mechanics.
- Enhanced the Lexus UAE Unity application by resolving build issues, integrating new vehicle models, and maintaining the project using the MVC architecture.
- Developed the FPS game Curious Cat, implementing AI pathfinding, enemy AI, gameplay mechanics, and interactive UI using Unity UI Toolkit.

Impacts

- Co-authored the DOI: "A novel methodology to solve ambiguity in XR headset", proposing an innovative solution to address ambiguity in next-generation XR headset interactions.
- Developed the AI POC: "Intelligent Camera", an AI-driven SmartThings concept for detecting and locating misplaced objects.
- Collaborated on feature ideation and rapid prototyping for Samsung SmartThings, contributing innovative concepts to enhance product functionality and user experience.

Education

Bachelor of Science in Computer Science and Engineering | 2020-2024

Military Institute of Science and Technology

CGPA: 3.51/4.00

Higher Secondary Certificate (HSC)

Milestone School & College

GPA: 5.00/5.00

Secondary School Certificate (SSC)

Milestone School & College

GPA: 5.00/5.00

Core Skills

Languages: C#, Swift, Python, Java, JavaScript, SQL

Frameworks: Unity, React.js, Next.js, SwiftUI, XAML, Spring Boot

Tools: Git, GitHub, Visual Studio, Xcode, Figma, Jira, Cline, Antigravity

Projects

Light Canvas - Flutter, Python, OpenCV, IoT, Figma

- Developed Light Canvas, an IoT-based interactive drawing system that converts any flat surface into a virtual drawing board using laser projection.
- Designed and built the hardware prototype from scratch, integrating IoT components with the mobile application.
- Implemented finger tracking and coordinate mapping using Python and OpenCV to capture drawings and synchronize them with the mobile application.
- Designed the application UI in Figma and developed the mobile application using Flutter.
- Developed learning modes that evaluate geometric drawings and provide real-time accuracy feedback.

Zoo Management System - React, Node.js, Express, PostgreSQL

- Animal directory with search, zone filter, diet filter, health filter, and detail modal.
- Auth pages for visitor registration and sign in.
- Protected ticket booking with adult, child, and family pricing.
- Unique ticket code generation and visitor ticket history.
- Normalized Prisma schema with indexes and relational seed data.

Achievements

- Champion, Research-Based Poster Presentation segment at the BUP IEEE Branch Fest, 2023.
- Top 20 position out of 450 teams from 10+ countries, WIEHACK 4.0, 2023.
- 2nd Runner Up, Anatolian Rover Challenge, 2022.
- Top 55 position, National Girls Programming Contest, 2021.

Problem Solving

- Solved 800+ problems on platforms such as Codeforces, LeetCode, VJudge, HackerRank, and CodeChef.
- Participated in National Girls Programming Contest 2021.
